

For the very first time the **MCap® SUPREME Classic Silver.Oil** successfully combined the advantages of metallized PP-film capacitors with the benefits of oil impregnated capacitors and the multi-faceted detail of silver conductors in 2002.

Silver of the highest purity (typically 99.99%) is first metallised with the thickest possible layer, then wound precisely into distinguished SUPREME winding geometry, then equipped with tin-plated copper wires and finally potted by hand into aluminium cans.

You will find extensive information about the technologies used on pages 6 to 8 in sections **2.0 • 2.2 • 2.2.2 • 3.5**.

#### General Information:

Dielectric: Polypropylene (PP)  
 Metallisation: Silver  
 $\tan \delta = 0.0002 @ 1\text{kHz} \cdot 0.0001 @ 10\text{kHz}$   
 Max. ambient temperature: 60°C/140°F  
 Further capacities and custom labeling are available on request.
