

## Power Capacitors Car Audio

**Storage capacitors** are basic equipment for every high class car stereo. Because no audio system is better than its power supply!

The installation should be performed by an expert only. Also any follow-up works at the car's electrical system have to be performed with utmost caution (danger of short circuit).

**Mundorf HeadCaps** solving almost every car receiver problem caused by voltage issues, like:

- Flickering monitors
- Losing navigation data while start/stop processes
- Losing phone connections while start/stop processes

Additional Features:

- More detailed, subtle and powerful music reproduction
- Available as on-board computer friendly version MPC68i
- Relieves and protects batteries and alternators
- Follow-me-home-music

### MPowerSupply HeadCap

Type	Rated Voltage [VDC]	Capacitance [ $\mu$ F]	Body $\varnothing$ * L [mm]	Wire $\varnothing$ * L [mm]
<b>NEW</b> MPC68	25	68000	50 * 80	M5 (2Nm)
<b>NEW</b> MPC68i	25	68000	50 * 90	M5 (2Nm)

## Inner Excellence
