

THE GRT-145-4

BY VIAWAVE AUDIO

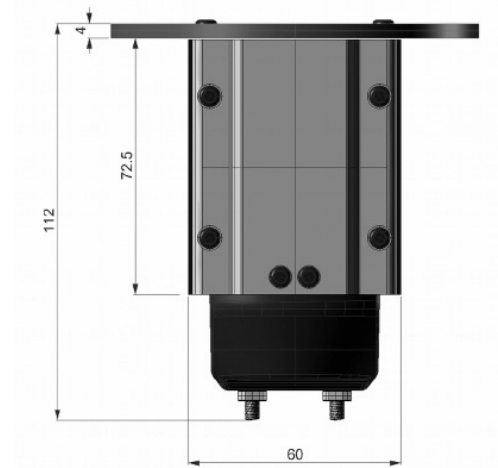

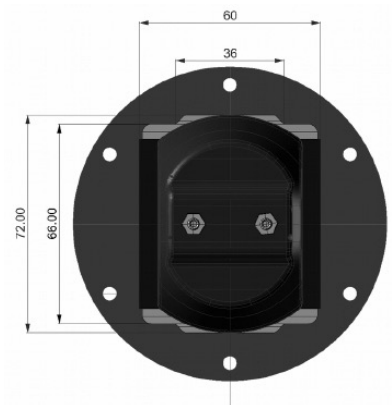

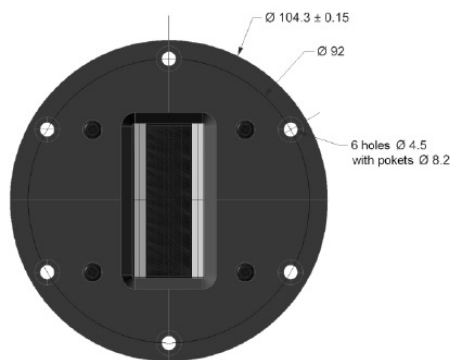

- 4-OHM RIBBON TWEETER
- SRT TECHNOLOGY
- U-SHAPED MYLAR SUSPENSION
- NEXT LEVEL SENSIBILITY
- HIGHLY PRAISED IN REVIEWS

Designed and hand assembled in Russia, with great attention to the finish and the build quality.

The GRT-145-4 is a new breed of ribbon tweeter. The SRT technology (Sealed Ribbon Tweeter) takes this type of tweeter to a new level. A true world first!

PRODUCT FEATURES

GRT-145-4

What makes the GRT-145-4 different?

The air gaps between the ribbons and the poles are sealed.

This sealing technology dramatically reduces harmonic distortion at low frequencies of the operating range.

The sensitivity is increased by 2 to 3 dB.

By combining the SRT technology with a powerful magnetic system, this ribbon tweeter offers a world first sensitivity level for a 7 cm² ribbon @ 95 dB/W/m in the 4 to 18 kHz range.

For a 4-ohm impedance tweeter, it corresponds to 98 dB/m at 2.83 V.

Key product features:

- ▶ Hand assembled with high attention to quality control and overall finish
- ▶ Impressive sensitivity and frequency response
- ▶ Low distortion due to the SRT technology
- ▶ Easy to implement for loudspeaker and crossover design
- ▶ Ultra clean cumulative spectral decay graph
- ▶ High-end performance at a reasonable price
