

MKT Cap

DESCRIPTION

Wound out of a metallized Polyester film (ZnA1).

Foil sides are covered with a layer of Zinc and then filled up with Polyurethane resin.

Lead wires made from tinned copper wire, diameter 0,6 mm for small values and 0,8 mm for greater ones.

Yellow in color and flattened for easy application.

All parameters in accordance with IEC 384-1

SPECIFICATION

Voltage rating: 160 VDC and 250 VDC

Tolerance: 10% (K)

Climatic category: 55/100/56

Loss factor at 1kHz (maximum): 8×10^{-4}

Insulation resistance at 100V: min.100000s
