

Wax Coil

Product Description

This product has been revived through cooperation with our audio partners.

The insulation used for Wax Coils is a special 60 µm quality paper.

The coil is wound with the same 4N copper foil, also used for Cross Coils.

Each coil is impregnated with a polymolecular paraffin Wax, making the coil hard as a rock!

Each coil is tested on the Clio system, before being shipped to the customer.

Tolerance +/-2%

Wax Coils are available in the following sizes:

16 AWG - 1,33 mm² - coil height 24 mm

14 AWG - 2.10 mm² - coil height 36 mm

12 AWG - 3,29 mm² - coil height 54 mm

On a special request smaller quantities also available in:

8 AWG – 8,46mm²– coil height 54mm

Wax Coil 16 AWG sustains 350 Watts RMS

Wax Coil 14 AWG sustains 500 Watts RMS

Wax Coil 12 AWG sustains 650 Watts RMS
